## 2. 60-Generation Dynamic Matrix (50% Update Commission)

---

A unique level-based matrix — the system locates the correct upline based on the updating member's level number.

<b>Logic</b>	When a member updates to Level N, the N-th upline receives the 50% Update Commission.
<b>Qualification</b>	To receive the Level N commission, the upline must already be at Level N or higher.
<b>Dynamic Pass-up</b>	If the N-th upline is not qualified, the system skips them and searches N more steps upward.
<b>Max Range</b>	The upward search continues for up to 60 Generations before stopping.

### 3A. ARF Token Reward — Doubling Logic

Every level upgrade grants ARF Tokens. The amount doubles at each step, creating exponential growth.
